Studies on Large Branchiopod Biology and Aquaculture II

Guest Editors:
D. Belk, H.J. Dumont & G. Maier

Hydrobiologia publishes original articles in the fields of fundamental limnology and marine biology.

The scope of the journal is wide and includes ecology, physiology, biogeography, methodology and taxonomy. Applied (technological) papers should be of general, not solely technical interest. Very long papers and review papers will be printed on invitation only. Proceedings of specialized symposia may also be accepted for publication, if the scientific standard set by the journal is met.

Editorial policy. All papers submitted will be considered for publication. They will be evaluated by the editors and referees on the basis of their data and ideas, which should be of more than regional significance. For example, local faunal lists, or chemical 'inventories' of waters not supplemented by interpretations of a more general nature are not acceptable.

Papers should be submitted with the understanding that they are unpublished, and not printed, submitted or accepted for publication elsewhere.
